FREELANCE/WORK PROJECTS

Bar Management App (Full-stack developer)

May 2024

Cozsa Technologies, Ibadan

- Developed a Bar Management App to streamline bar operations including inventory management, sales tracking, customer trend analysis, and pricing.
- Implemented JWT authentication, integrated MongoDB for scalable data management, and created intuitive CRUD operations and real-time updates.
- Tools: MERN stack (MongoDB, Express.js, React, Node.js).

Dantis AI (Mobile Developer)

Mar 2023 – Sep 2023

Cozsa Technologies, Ibadan

- Developed a mobile app to help monitor and manage trades, providing automated trading insights and real-time market data.
- Integrated real-time data APIs for fetching live market data and executing trades.
- Converted Figma UI designs to pixel-perfect code, maintaining design integrity across various devices.
- Tools: React Native, RESTful APIs, Git.

PERSONAL PROJECTS

Notes APP (Backend Developer)

May 2024

- Enhance API security with JWT authentication.
- Manage scalable blog data seamlessly using MongoDB.
- Perform effortless CRUD operations on posts, comments, and profiles.
- Implement real-time notifications for instant user engagement.
- Technologies: Node.js/Express for the backend, MongoDB for the database, and React Native for the frontend.

Maintenance Report API (Full-stack Developer)

April 2024

- Enhance API security with JWT authentication.
- Manage scalable blog data seamlessly using MongoDB.
- Perform effortless CRUD operations on posts, comments, and profiles.
- Implement real-time notifications for instant user engagement.
- Technologies: Node.js/Express for the backend, MongoDB for the database, and React Native for the frontend.

Blog API (Backend Developer)

February 2024

- Enhance API security with JWT authentication.
- Manage scalable blog data seamlessly using MongoDB.
- Perform effortless CRUD operations on posts, comments, and profiles.
- Implement real-time notifications for instant user engagement.
- Technologies: Node.js/Express for the backend, MongoDB for the database, and React Native for the frontend.

Restaurant Food and Drinks Menu APP (Full-stack Developer)

November 2023

- Real-time updates linked to Firebase.
- Explore a wide variety of food and drink options.
- Beautifully presented menu items.
- Sleek and intuitive user interface.
- Technologies: Flutter for the frontend and Firebase for the backend.
